X5-T

HIGH THROW

The X5-T High Throw UV Flatbed Printer is designed to deliver superior performance on contoured surfaces and long-distance drop applications. With its advanced high-throw print capability, this cutting-edge printer ensures exceptional print quality on hard goods and irregular surfaces, making it the ideal choice for industrial and promotional product printing.

Featuring an extended jetting distance of up to 0.59", the X5-T High Throw achieves precise, high-quality printing on up to 25% of a curved surface*, ensuring vibrant colors and fine detail. Its large 43" x 24" print area allows for batch printing of multiple items or larger industrial products, enhancing efficiency and throughput.

Equipped with the latest print head technology, the high-throughput X5-T High Throw prints in CMYK plus two highly opaque UV LED-curable white inks, with an optional varnish for added visual impact. Additionally, it features a 19.7-inch drop vacuum table, setting a new standard for printing on tall and contoured objects.
