---	---	----------------------------	---

For technical reasons, the Institute will allocate a new test number to each order for the renewal of a certificate.

The renewed certificate will always be issued under the master number indicated in the first certification. The master number in brackets will be suffixed to the current test number of this expertise and will serve to identify the relevant product. The additional designation "ZV" with a number indicates the number of times the certificate has been renewed.

The application for renewal of the certificate was submitted using the relevant forms issued for this purpose.

The applicant enclosed the declaration of conformity and agreed to the terms of use.

The originals of all necessary documents have been signed with a legally binding signature.

The orderer confirmed that no biological active product is used.

Further the orderer confirmed that no flame retardant product is used.

The applicant documents that there are no changes to the previous certified product.

The copy of ECO PASSPORT by OEKO-TEX® certificate 22.0.46708 for the products in use was enclosed with the application.

The certificate was valid at the date of application for certification.

The orderer has stated in a legally binding declaration that there is no additional chemical modification, reformulation or dilution.

The application was made for the following product category:

Textile auxiliaries for dyeing and printing

The certification was requested for the below mentioned product:

1000HNX Hardener

Representative sample material has been submitted.

---

## TEST RESULT/S

---

Laboratory tests were not required.

The substances/materials are already certified according to ECO PASSPORT by OEKO-TEX®. The certificates of the substances/materials have been submitted to proof this.

---

## CONCLUSION

---

The requirements of the ECO PASSPORT by OEKO-TEX® for textile auxiliaries for dyeing and printing are met.

The certification of the following product

1000HNX Hardener

according to ECO PASSPORT by OEKO-TEX® for the product classes I, II, III and IV of the STANDARD 100 by OEKO-TEX® and LEATHER STANDARD by OEKO-TEX® is approved.

ZDHC MRSL conformance Level 1 is ensured based on the ECO PASSPORT by OEKO-TEX® certificate 22.0.46708. This applies exclusively to products without restriction(s), if not otherwise indicated.

With correct application of the tested products it is therefore assumed that the treated article will meet the limits of the product classes I, II, III and IV of the STANDARD 100 by OEKO-TEX® and LEATHER STANDARD by OEKO-TEX®. (This refers exclusively to the checked parameters.)

Each holder of certificate has signed for the quality of his articles on his own responsibility. This is in accordance with the given declaration of conformity. He is committed to ensure this by suitable and sufficient spot checks. This commitment includes the quality of bought materials. In the case of delegating parts of this quality assurance to others the certifying body must be fully acquainted (see point 4 "Conformity declaration").

OEKO-TEX® is authorized to carry out spot checks in order to inspect the certified goods. The certificate holder will receive a separate test report with the results of these inspections. If the spot checks reveal a deviation from the threshold values, additional tests will have to be carried out. The relevant costs will be charged to the certificate holder.

The applicant is responsible for checking the validity of the certificates issued to his suppliers.

If the term of validity of these certificates expires within the term of validity of the applicant's certificate, he is obliged to request updated or extended certificates from his suppliers.

Copies of updated certificates from suppliers should be presented as proof and for documentation purposes under the test number of the applicant's certificate.

The current version of ECO PASSPORT by OEKO-TEX® is edition 03.2024. It can be downloaded directly from the OEKO-TEX® Homepage (<http://www.oeko-tex.com>).

The results relate only to the samples examined. The measurement uncertainty of the method is already considered while determining limit values, unless otherwise noted. This report must only be reproduced in full and not in extract form. Use of the report in advertising or the publication of free interpretations of the results is only allowed with the express permission of Hohenstein. Only the authorized report is legally binding.  
The accreditation applies for the methods listed in the annex to the certificate (accreditations see [www.hohenstein.de/de/about\\_hohenstein/accreditation/accreditation.html](http://www.hohenstein.de/de/about_hohenstein/accreditation/accreditation.html)) - marked <sup>A</sup> in the report.
